Card Processing Services

WHERE DO YOU WANT TO *grow?*

Using an external vendor for debit card processing?

If you're looking for a more robust card processing system or are simply unhappy with the service received from your current vendor, DataPath card processing services can help you get where you want to grow.

For more than a decade, DataPath has been an end-to-end card processor for benefits debit cards linked to tax-advantaged benefits accounts, Medicare set-aside programs, and different types of post-tax accounts.

All Administrative Systems

Whether you have an in-house system or a commercial admin platform from a vendor whose card processing services have proven less than satisfactory, you can use DataPath's secure and efficient debit card processing services.

All Plan Types

DataPath card processing services are available for a variety of plan types:

| Healthcare and Dependent Care Flexible Spending Accounts (HCFSA/DCFSA) | Health Reimbursement Arrangements (HRA) | Health Savings Accounts (HSA) | Commuter/Transit Accounts (Section 132) | Lifestyle Spending Accounts (LSA) and other plans |

Security and Experience

DataPath was one of the founding members of SIGIS. We maintain a well-established, secure gateway to Mastercard®, and card transactions are processed by our experienced, U.S.-based card services team. Multiple vendors and unnecessary data transfers are all eliminated, greatly reducing data security risks.

Schedule Your Demo Today

DataPath card processing services can also handle stacked benefits and virtually any type of card-based transaction restrictions. The full extent of available processing can be discussed during a customized demo of the system.

Visit **datapathsummit.com/cardprocessing** today to schedule your custom demo.
